Highlands Housing employs innovative building methods learned from years of research and experimentation to achieve the greatest livability at the lowest possible cost for our customers.

"If not for Highlands Housing, affordable, energy efficient housing would be nonexistent. It just wouldn't be available for so many families needing good, quality housing." - Bruce Chestnut, Owner, Wayne Manufactured Structures

Creating New Industries
Highlands Housing has led research and development projects in partnership with the University of Kentucky and a private corporation that led to the establishment of a new modular home manufac-

Building New Communities
In 2013, Highlands Housing earned the distinction of having built the largest concentration of homes meeting Passive House US standards in America.

Providing Community Revitalization
Highlands Housing recently launched a pilot initiative called ROOTS, (Recycling Our Outdated Trailer Sites) to remove from service old mobile homes, (especially pre-1980) and replace them with newly constructed, energy efficient permanent homes to provide long-term affordability and comfort while also spurring community revitalization.
